PARAGON
TECHNOLOGIES EUROPE

Why choose Paragon?

With over 30 years of experience and knowledge of hydraulics, you can come to Paragon for overhaul of valves, pumps, motors, accumulators and other hydraulic components.

By combining the strength of this hydraulic knowledge with the existing knowledge and experience of electronics at our parent company in the US (Michigan), Paragon has become a unique specialist for the repair and adjustment of servo and proportional valves. With our available experience, all standard, cartridge, servo and proportional valves as well as complex manifold blocks are overhauled in our own workshop.

Paragon is brand independent and is familiar to repair valves from all different brands (Bosch-Rexroth, Moog, Vickers, Parker, ...)

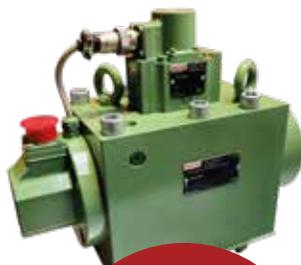

OUR MAIN GOALS:

- ❖ Keep your production running
- ❖ Reduce your downtime drastically
- ❖ Enabling you to make savings on recurring replacement costs

Our strong points:

- ◇ Clean and calibration of your valves
- ◇ Repair all brands and models
- ◇ Short repair times
- ◇ Huge stock in spare parts
- ◇ Quotations are free of charge
- ◇ All repairs are tested
- ◇ Settings according OEM or customer specification
- ◇ 1-year full-service warranty

WORKSHOP**

Our most popular brands:

Bosch - Rexroth

4WREE, 4WRTE, 4WSEM, 4WRLE, ...

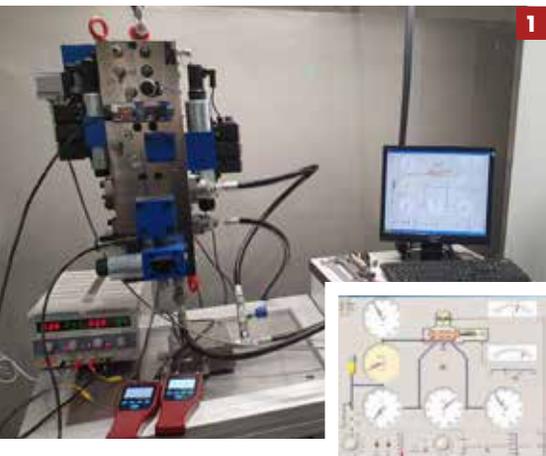

EATON - VICKERS

KDG4, KBDG, KSBGD, ...

D1FLE

A passion for technics, servo and proportional valves.

1 Cartridge valves sizes 32 to 125 can be tested with a test report for function and leakage by means of special test manifolds that are connected to the test unit.

2 With our new "servo motor driven" test bench (from end 2022), 45kW, 315 bar and 80 l/min, valves are adjusted even more comprehensively and accurately.

3 Each valve is tested extensively during quotation to find out the faults, after the repair the valve is tested and calibrated according to OEM or customer-specific settings.

Denison

D31FHE, D81FHE, ...

MOOG
HYDROLUX
